New York, NY | (646) 541-9891 | advaitnaresh@gmail.com | [linkedin.com/in/advait-jishnani](https://www.linkedin.com/in/advait-jishnani) | github.com/advaitnaresh

EDUCATION

New York University

Master of Science in Computer Science

Sept 2025 - May 2027
New York, NY | **GPA: 4.0/4.0**

Birla Institute of Technology and Science, Pilani

Bachelor of Engineering in Computer Science, Minor in Finance

Aug 2020 - May 2024
Goa, India | **GPA: 4.0/4.0**

WORK EXPERIENCE

Salesforce Assistant

New York University

Dec 2025 - Present

New York, NY

- Rebuilt the **Stripe payment and enrollment workflow** with Salesforce Flow automations, enabling student onboarding across multiple NYU Tandon courses supporting **\$300K+ in revenue**.
- Designed an **Aura-based web application** with reusable templates and onboarding paths, translating stakeholder requirements into maintainable user-facing workflows.
- Integrated **Salesforce, Stripe, and Brightspace** through automated workflows and REST APIs, reducing manual handoffs and improving cross-system reliability.

Data Engineering Intern

Return on Creators

Jun 2026 - Aug 2026

New York, NY

- Built a **full-stack React admin inbox** with real-time messaging and underlying Python services, shipping production features across frontend, backend, and data layers.
- Shipped an end-to-end **iMessage creator onboarding flow** with Supabase and automated routing, designed to support up to **1,000 simultaneous creators** while preserving production reliability.
- Re-keyed a production messaging table to a **composite key**, rebuilt inbound routing across multiple lines, and resolved **3 data-integrity bugs** through testing and production debugging.

Data Engineer

Visa Inc.

Jan 2024 - Aug 2025

Bengaluru, India

- Automated the end-to-end **MRM process and model-refitting pipeline**, cutting turnaround time by **60%** and manual effort by **80%**.
- Implemented automated testing, validation, monitoring, and alerting across **15+ production models**, catching failures before downstream release.
- Orchestrated dependencies, retries, scheduling, and monitoring across **20+ Apache Airflow production workflows**, improving reliability of recurring backend and data processing.
- Engineered large-scale financial-data transformations with **Python, Java, SQL, PySpark, and Hive** while supporting Tableau reporting for **30+ cross-functional stakeholders**.

Data Engineer Intern

Visa Inc.

May 2023 - Jun 2023

Bengaluru, India

- Reduced a production query from **2 hours to under 12 minutes**, a **90% improvement**, using partitioning, caching, and bucketing in Hive and Spark.
- Optimized large-scale analytical workloads through **Hive and Spark performance tuning** across production datasets.

PROJECTS

RoCathon: Hybrid Creator Search | [GitHub](#) | *PostgreSQL, pgvector, TypeScript, Node.js, Gemini*

- Won **1st place** by building a hybrid search system over **10,000+ creator profiles**, combining lexical and HNSW vector retrieval across structured and semantic signals.
- Improved top-result relevance by **35%** through commerce-aware reranking, metadata filters, semantic retrieval, and Gemini embeddings.

Aries: Real-Time Data Platform | [GitHub](#) | *Apache Spark, Kafka, Python, PostgreSQL, MinIO*

- Processed **10,000+ streaming events per second** through a Kafka and Spark pipeline built for real-time data processing and downstream consumption.
- Served live KPIs at **under 100 ms latency** through a tiered storage architecture using MinIO and PostgreSQL.

VulCAN: Automated Cloud Vulnerability Analyzer | [GitHub](#) | *AWS Fargate, SQS, Python, PostgreSQL, CDK*

- Accelerated security-remediation workflows by **75%** with an event-driven, cloud-native scanning service deployed through AWS CDK.
- Sustained **5,000+ daily jobs** without queue bottlenecks by decoupling asynchronous processing with AWS SQS and Fargate.

SKILLS

Languages: Python, SQL, Java, C++, TypeScript, JavaScript, Bash

Software & Backend: React, Node.js, REST APIs, Distributed Systems, Git/GitHub, CI/CD

Data Engineering: PySpark, Spark, Airflow, Kafka, Hive, ETL/ELT, Data Modeling, Data Quality, Query Optimization

Databases & Cloud: PostgreSQL, pgvector, MongoDB, Supabase, MinIO, AWS, GCP, Docker, Kubernetes

AI & Analytics: LLMs, RAG, Embeddings, Vector Search, HNSW, Gemini API, Machine Learning, Model Evaluation, Tableau
